

Water Sanitation and Hygiene

What are some problems in this picture?

Why Use Toilets?

- Maintains privacy
- It is a sanitary way to rid of waste and pour it away into sewers
- Avoids spread of infection/disease
- Symbol of status and respect
- Prevents contamination of sources of water

Remember When Using Toilets

- Keep water in a bucket inside the toilet
- Keep separate sandals for the toilet
- Always pour some water in the pan before excreting. It will prevent feces from sticking to the pan
- Always flush the urine and stool with water
- Keep soap and water near the toilet
- Always wash your hands after using the toilet

Making a Low Cost Toilet
